

Metadata Validation Rules — MVP

DSP-universal rules (independent of DaaS vendor). Each rule maps 1:1 to a `validation_issues` row: `code`, `severity`, `field`, `message`.

Gate logic: a release can be submitted only if it has zero unresolved `error`-severity issues. `warning`-severity issues surface to the artist but do not block. Re-run the full rule set on every submit and on every edit while in `draft`.

Codes are stable strings — hardcode the checks or load this table into a `validation_rules` config table; either way `validation_issues.code` matches.

Release-level

Code	Severity	Check	Field	Message
MISSING_TITLE	error	title is null/empty	title	Release required.
MISSING_GENRE	error	genre_id is null	genre	Select a genre.
MISSING_LANGUAGE	error	language is null	language	Set the release language.
MISSING_PRIMARY_ARTIST	error	primary_artist_id is null	primary_artist	A primary artist is required.
NO_TRACKS	error	release has 0 tracks	tracks	Add at least one track.
MISSING_ARTWORK	error	artwork_asset_id is null	artwork	Cover art is required.
ARTWORK_TOO_SMALL	error	artwork width < 3000 or height < 3000	artwork	Artwork must be at least 3000x3000.
ARTWORK_NOT_SQUARE	error	artwork width ≠ height	artwork	Artwork must be square.

Code	Severity	Check	Field	Message
ARTWORK_NOT_RGB	warning	artwork color mode ≠ RGB	artwork	Artwork must be RGB, not CMYK/grayscale
ARTWORK_TEXT_VIOLATION	warning	OCR/vision finds URL, @handle, price, or contact info	artwork	Remove social handle or pricing from the cover. Flagged manually for review.
RELEASE_DATE_MISSING	error	release_date is null	release_date	Set a release date.
RELEASE_DATE_TOO_SOON	warning	release_date - today < 7 days	release_date	Release at least 7 days in advance for editorial pitching.
RELEASE_DATE_IN_PAST	error	release_date < today AND original_release_date is null	release_date	New releases can't be in the past. original_release_date is for reissues.
SINGLE_TRACK_COUNT	warning	type = 'single' AND track count > 3	type	Singles should have ≤ 3 tracks. Consider an EP or album.
VARIOUS_ARTISTS_MISUSE	warning	display_artist ILIKE 'various%' AND type ≠ 'compilation'	display_artist	"Various Artists" is only for compilations.
ALL_CAPS_TITLE	warning	title is all uppercase (and not a known stylization)	title	All-caps titles are often rejected.
EMOJI_IN_METADATA	error	title/display_artist contains emoji	title	Emojis in title/artist are rejected on DSPs.
DUPLICATE_RELEASE	warning	same UPC already delivered title	upc	A title can only be delivered once with a UPC.

Track-level

Code	Severity	Check	Field	Message
MISSING_AUDIO	error	audio_asset_id is null	audio	Upload file for track.
AUDIO_BELOW_SPEC	error	sample_rate < 44100 or bit_depth < 16	audio	Audio must be ≥16-bit / kHz.
AUDIO_LOSSY_SOURCE	warning	audio_format = 'mp3'	audio	Lossy sources like WAV/FLAC are recommended for full support.
AUDIO_TOO_SHORT	warning	duration_ms < 30000	audio	Tracks must be at least 30 seconds long.
TRACK_MISSING_TITLE	error	title is null/empty	title	Track title is required.
VERSION_IN_TITLE	warning	title matches '(Remix)'	Live	Acoustic or Live versions should be in the title.
FEAT_NOT_CREDITED	warning	title matches 'feat.' AND no featured_artist credit	ft. AND no featured_artist credit	credits
EXPLICIT_MISMATCH	warning	lyrics contain profanity AND explicit = false	explicit	Lyrics that are explicit must have explicit = true. If track is clean, lyrics should not contain profanity.
INSTRUMENTAL_HAS_LYRICS	warning	is_instrumental = true AND lyrics is not empty	lyrics	Instrumental tracks should not have lyrics.
PREVIEW_OUT_OF_RANGE	warning	preview_start_ms ≥ duration_ms	preview	Preview must be within the track duration.
ISRC_DUPLICATE	error	isrc already assigned to a different track	isrc	This ISRC is already assigned to another track.

Code	Severity	Check	Field	Message
ENCODING_MOJIBAKE	warning	Ethiopic/Unicode text contains replacement chars (◆)	title	Character encoding corrupt check Amharic text.

Splits / rights-level

Code	Severity	Check	Field	Message
SPLIT_MISSING	error	track has 0 recording splits	splits	Add recording splits for every track.
SPLIT_TOTAL_NOT_100	error	sum(percent) where right_type='recording' ≠ 100.0000	splits	Recording splits must total exactly 100%.
SPLIT_PAYEE_NO_PAYOUT	warning	a split payee has no verified payout method or KYC ≠ verified	splits	A collaborator can earn but can't be paid yet (no verified payout).
SPLIT_UNACCEPTED	warning	a split has status = 'pending' (if acceptance flow enabled)	splits	A collaborator hasn't accepted their split.

System checks at submit (not shown to artist as fixable)

Code	Severity	Check	Action
<code>SYS_UPC_UNASSIGNED</code>	error	<code>release.upc</code> is null at submit	Allocate UPC via <code>identifier_counters</code> before delivery.
<code>SYS_ISRC_UNASSIGNED</code>	error	any <code>track.isrc</code> is null at submit	Allocate ISRC per track before delivery.
<code>SYS_ARTIST_ID_MISSING</code>	warning	primary artist has no spotify/apple artist id	Risk of wrong-artist page; prompt to claim/link profiles.

Notes

- Auto-detectable now (cheap): all `null/spec/format/sum` checks. Build these first.
- Needs analysis (defer or manual-review): `ARTWORK_TEXT_VIOLATION` , `EXPLICIT_MISMATCH` , `AUDIO_TOO_SHORT` silence/clipping. Ship as manual-review warnings until you add OCR/vision/audio analysis.
- The `==100%` split check lives here (at submit), because the DB trigger only enforces `≤100%` so drafts stay editable.
